

INSTALLATION GUIDE FOR STEEL STUD CONSTRUCTION – EXTERIOR ATTACHMENT

Maximum Distance Between Framing and Washer	Required Screw Length	Corresponding Screw Size
5/8"	1 5/8"	#6
1"	2"	#6
1 1/2"	2 1/2"	#8
2"	3"	#8
2 1/2"	3 1/2"	#10
3"	4"	#10
3 1/2"	4 1/2"	#10
4 1/2"	5 1/2"	#10
5"	6"	#10

PRONGS PRE-SET INTO FOAM

CORROSION RESISTANT CERAMIC COATING

Screw Length: Screws should be at least 1" longer than the total thickness of exterior sheathing components, i.e., face of framing to underside of washer. For example, an assembly with 5/8" exterior gypsum and 2" insulation has a total thickness of 2 5/8" and requires a minimum 3 5/8" screw. The next available size would be 4".

Recommended Fastening Patterns:

ECOMAXci® Wall Solution

Refer to ECOMAXci® Wall Solution Installation Instructions for fastening pattern and complete guidelines.

ECOMAXci® FR ECOMAXci® FR White TSX-8520 Thermasheath® Durasheath® R-Matte® Thermasheath®-XP

4'x8' Panel – 16" o.c. studs

4'x8' Panel – 24" o.c. studs

Additional fasteners (up to 12:16 spacing) may be required in locations expected to experience additional loading (heavy wind drafts/gusts, accelerated wear and tear, etc.).

Additional Notes:

- Head should be flush with insulation, do not countersink
- Other materials, such as gypsum, should be fastened separately per manufacturer's instructions

INSTALLATION GUIDE FOR WOOD OR STEEL STUD CONSTRUCTION – INTERIOR ATTACHMENT

Maximum Distance Between Framing and Washer	Required Screw Length	Corresponding Screw Size
5/8"	1 5/8"	#6
1"	2"	#6
1 1/2"	2 1/2"	#8
2"	3"	#8
2 1/2"	3 1/2"	#10
3"	4"	#10
3 1/2"	4 1/2"	#10
4 1/2"	5 1/2"	#10
5"	6"	#10

PRONGS PRE-SET INTO FOAM

CORROSION RESISTANT CERAMIC COATING

Screw Length: Screws should be at least 1" longer than the total thickness of interior sheathing components, i.e., face of framing to underside of washer. For example, an assembly with two layers of 1" insulation has a total thickness of 2" and requires a minimum 3" screw.

Recommended Fastening Patterns:

ECOMAXci® FR ECOMAXci® FR White TSX-8520 Thermasheath® Durasheath® R-Matte® Thermasheath®-XP

4'x8' Panel – 16" o.c. studs

4'x8' Panel – 24" o.c. studs

Additional fasteners (up to 12:16 spacing) may be required in locations expected to experience additional loading (heavy wind drafts/gusts, accelerated wear and tear, etc.).

Additional Notes:

- Head should be flush with insulation, do not countersink
- Other materials, such as gypsum, should be fastened separately per manufacturer's instructions

INSTALLATION GUIDE FOR CONCRETE/MASONRY CONSTRUCTION

Optimal Range of Total Sheathing Thickness	Required Fastener Length
½" – 1"	2"
1" – 1 ½"	2 ¾"
1 ½" – 2 ½"	3 ½"
2 ½" – 3 ½"	4 ½"
3 ½" – 4 ¼"	5 3/8"

Fastener Length: Fasteners should be at least 1" longer than the total thickness of sheathing components, i.e., face of masonry substrate to head of fastener, but not more than 2". For example, an assembly with two layers of 1" insulation has a total thickness of 2" and requires a minimum 3" fastener. The next available, optimal size would be 3 ½".

Recommended Fastening Patterns:

ECOMAXci[®] Wall Solution

Refer to ECOMAXci Wall Solution Installation Instructions for fastening pattern and complete guidelines.

ECOMAXci[®] FR ECOMAXci[®] FR White TSX-8520 Thermasheath[®] Durasheath[®] R-Matte[®] Thermasheath[®]-XP

4'x8' Panel, < 2.5" thick

4'x8' Panel, ≥ 2.5" thick

NOTE: Additional fasteners (up to 12:16 spacing) may be required in locations expected to experience additional loading (heavy wind drafts/gusts, accelerated wear and tear, etc.).

Additional Notes:

- Head should be flush with insulation, do not countersink
- Other materials, such as gypsum, should be fastened separately per manufacturer's instructions
- Pre-drill hole with 5/16" masonry bit. Tap in with hammer.
